

## **Network Cabling**

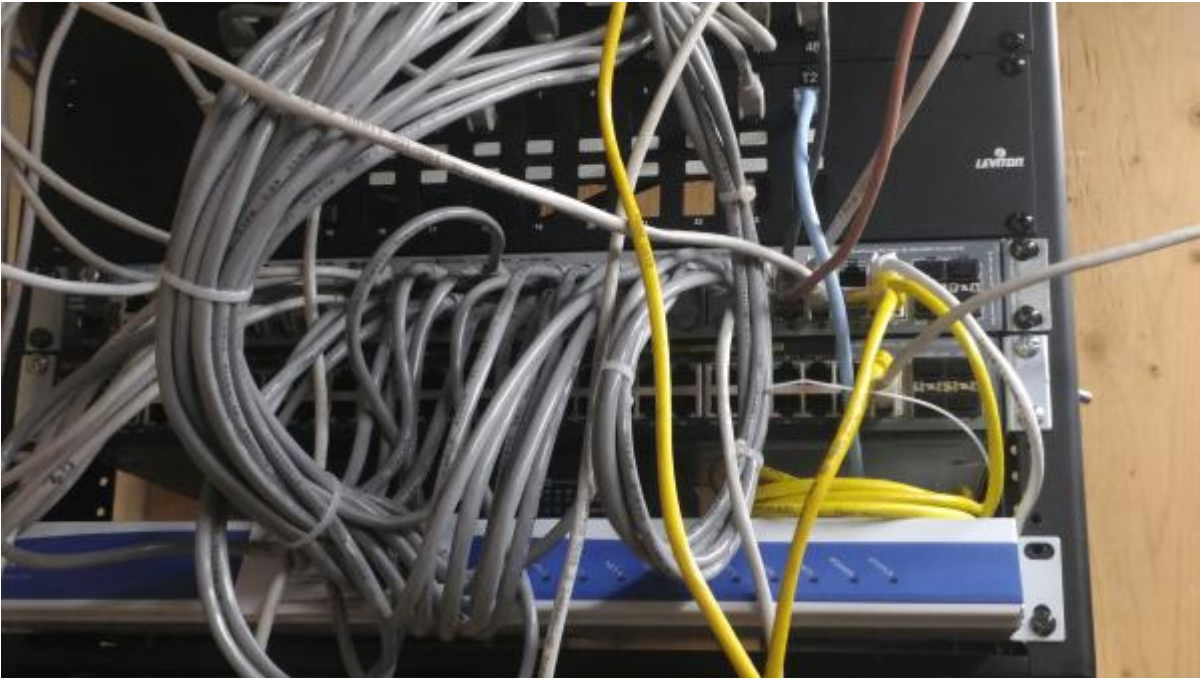

SkyNet can run and certify cat-5 and cat-6. If your in need of cables to be run in your building please feel free to call. No job is to big we work many different contractors, so the job can get done no matter the what. We also put in all the rest fo the equipment needed for networks like racks, punch down blocks, rj45's, patch pannels, etc....

Does your network cabling look like this? We can clean up exsisting or install all new.

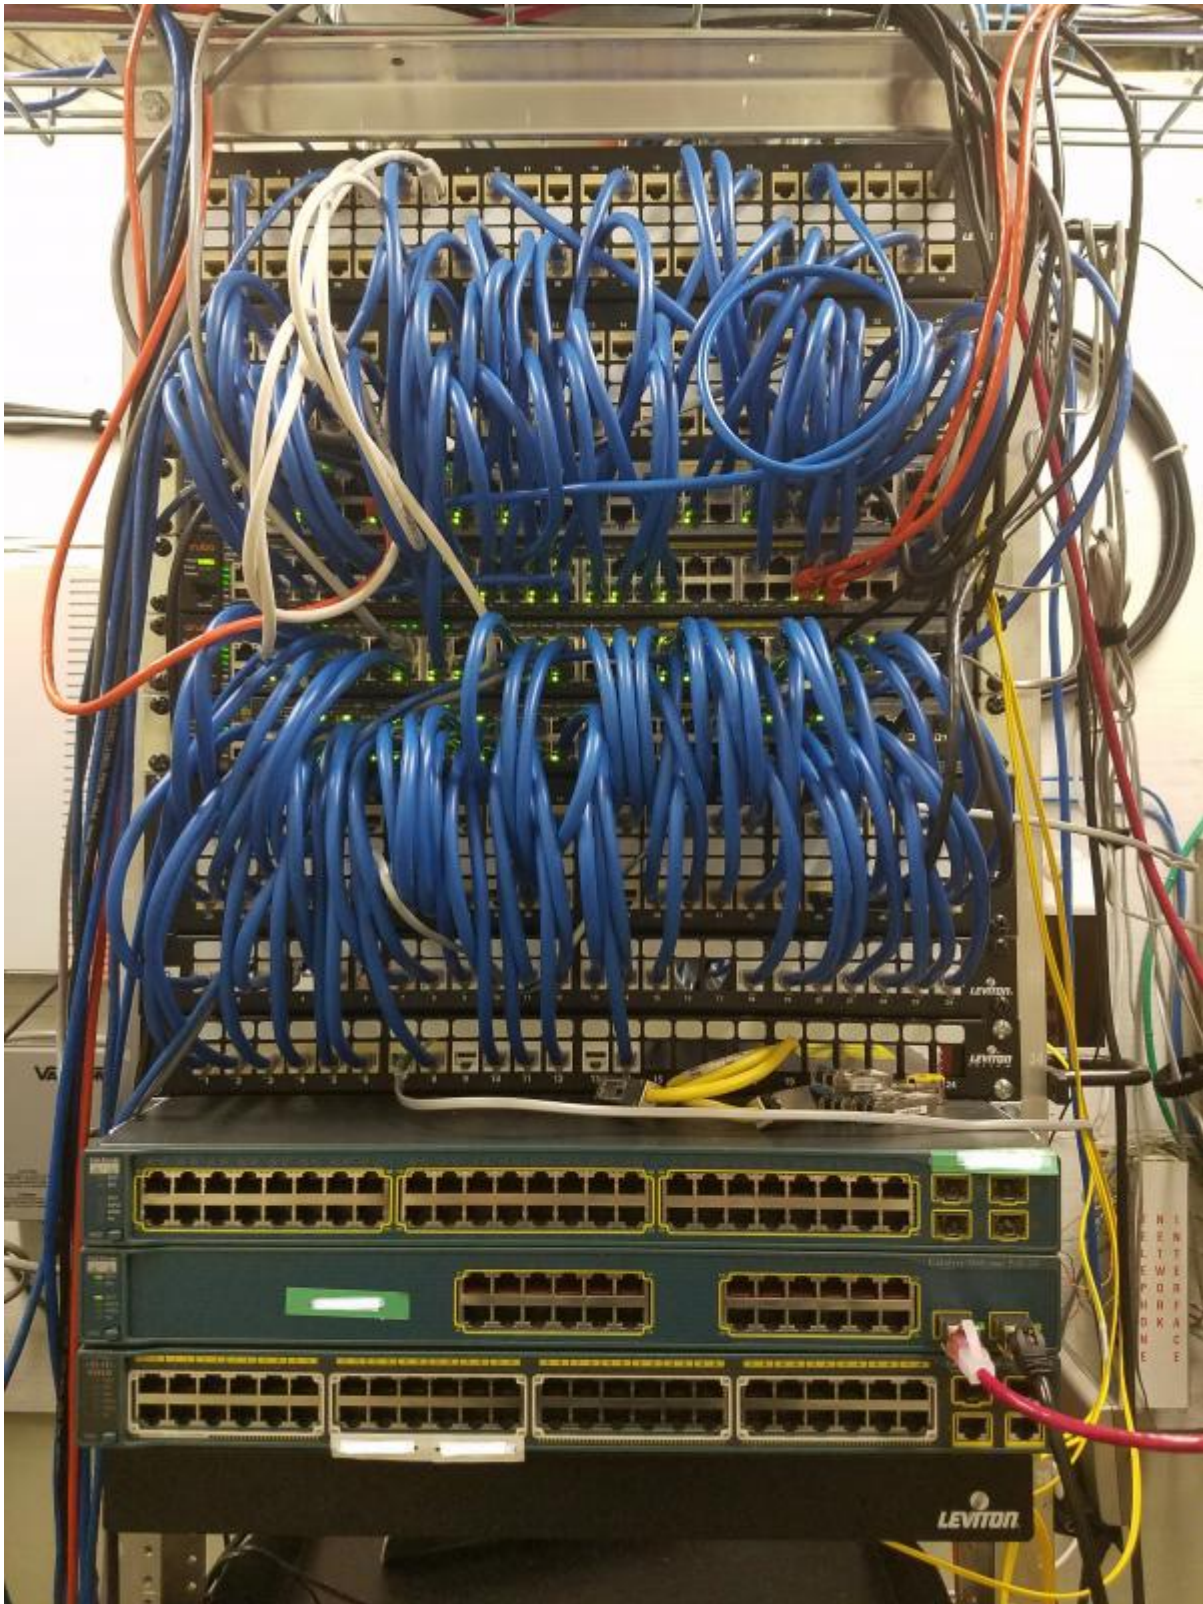

When it could look like this:
